

Dear Travel Partner,

We're delighted to share an exciting milestone in Air India Express' transformation journey: the unveiling of our **first retrofitted Boeing 737-8 aircraft**.

Since the launch of the new AIX brand and service philosophy 2 years ago, we continue to elevate the guest experience as we invite flyers across South Asia, Southeast Asia and The Middle East, with **500 daily flights across 60 destinations**.

What's New Onboard?

Enhanced Comfort: Ergonomical leatherette seats with plush cushioning and wider armrests

Xtra legroom: Seat pitch ranging from 74 cm - 96 cm (29 inches - 38 inches)

In-seat Power: USB charging ports at every seat, keeping our guests powered throughout their journey.

Spacious overhead bins: Enhanced storage capacity for cabin baggage

Refreshed Cabin Interiors: Boeing Sky lighting, creating a warm and welcoming cabin ambience.

By mid-2026, all 50 of our Boeing 737-8 aircraft will feature the new standardised 189-seat configuration, ensuring a consistent and elevated experience across our network.

From the Leadership

Speaking at the unveiling, **Aloke Singh, Managing Director, Air India Express**, said:

"This retrofit programme is not just about standardising the look and feel of our cabin, but about meaningfully enhancing the inflight experience for our guests. The densification will enhance seat capacity by around four aircraft equivalents. As we continue to grow, we remain focused on delivering consistent, reliable, and elevated experiences for travellers across India and beyond."
