

At the airport / Security and baggage

# Hand baggage and liquids

What you can carry through security as hand luggage for departing flights.

Dear Partners,

Great news from London Heathrow: The airport has now completed the rollout of its new CT security scanners across all terminals. This upgrade means passengers no longer need to remove liquids or laptops during security screening, and liquids of up to two litres can remain in hand luggage.

This change should make the travel experience significantly smoother and more efficient for everyone passing through Heathrow.

See link here to Heathrow's updated website: <https://www.heathrow.com/at-the-airport/security-and-baggage/hand-baggage-and-liquids>

Best Regards,

**Xi Chang**
