

Work, watch, enjoy...on us.

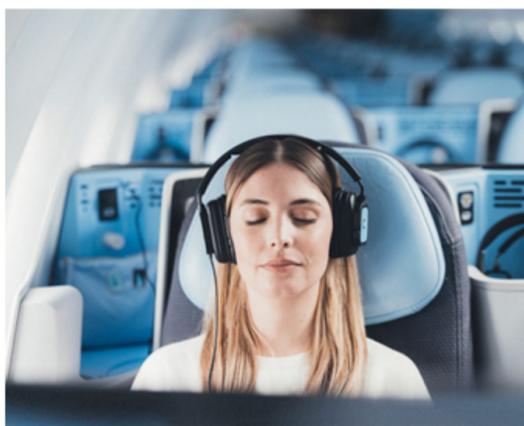

Complimentary Wi-Fi is standard on every flight. As an all-business class airline, we believe in fewer add-ons and more ease, so you can work, watch, or unwind without a second thought.

THE ONBOARD EXPERIENCE

How much connection do you want ?

La Compagnie is your private lounge in the sky. Stay in the loop, stream a little, work... and feel free to glide back into "do not disturb" mode with a glass of something good whenever you feel like it.

We partner with Viasat, a trusted leader in airline Wi-Fi, to keep your connection smooth and consistent. The result: reliable performance with only 1.2% degraded performance from boarding to landing.

You've got the bandwidth for this
For the to-do list and the watchlist, speeds generally run above 3 Mbps, with peaks up to 10 Mbps based on coverage and cabin usage.

It activates quickly, plays nicely with all your devices, and is easy to manage from a clear interface. Performance is optimized for what you're doing and protected by advanced security.
