

Your option for affordable GLP-1 medication

Help your patients save thousands of dollars and achieve their health goals.

How It Works

1 Prescriber sends the prescription to Springmeds

Fax included prescription form to 1-888-870-2808

Call 1-888-305-1722, dial option 2

TIP: Faxing or calling in the prescription ensures speedy processing and accuracy. EMR software for e-prescribing does not generally support compounded medication.

2 Patient sets up account with Springmeds

Patients can either:

- Scan QR code to order online
- Call 1-888-305-1722 to order over the phone

TIP:

Using our website, patients can:

- Set up their account
- Get real-time, up-front pricing on all medication
- Keep track of prescriptions
- Submit for refills

all from the comfort & convenience of their homes!

3 Medication is shipped directly to the patient's home!

Medication is shipped with 2 day delivery after processing

GLP-1 MEDICATIONS FOR AS LITTLE AS \$100 A MONTH

COMPOUNDED SEMAGLUTIDE

Same active ingredient as Ozempic and Wegovy

Semaglutide 1mg/1mL - \$150
Semaglutide 2.5mg/1mL - \$175
Semaglutide 5mg/2mL - \$200
Semaglutide 12.5mg/2.5mL - \$300

COMPOUNDED TIRZEPATIDE

Same active ingredient as Mounjaro and Zepbound

Tirzepatide 10mg/1mL - \$200
Tirzepatide 30mg/3mL - \$300
Tirzepatide 60mg/3mL - \$400

Product availability may be impacted by FDA Shortage List. Titration guides included on pages 5 and 6.

How do we get “\$100 a month”?

Below is an eight-week treatment plan, where the patient receives 0.25 mg per week in the first month (1 mg) and 0.50 mg per week in the second month (2 mg), totaling 3mg of product used. The required medication comes from a single semaglutide 5mg/2ml vial costing \$200, making the monthly treatment cost \$100.

Weeks	Dose per week (mg)	Total Product Used (mg)
1 to 4 month one	0.25	1
5 to 8 month two	0.50	2

Total Product Used (mg): 3

Vial Needed: (1) Semaglutide 5mg/2ml
Cost of Vial: \$200

Cost per Month of Treatment: \$100

SEMAGLUTIDE TITRATION GUIDELINE

The following guidelines on titration schedule are based on the commercially available products.

First Two Months:

- 0.25mg per week for 4 weeks
- 0.50mg per week for 4 weeks

To follow this schedule, the patient receives the following:

- 1 Semaglutide 5mg/2ml vial
- Syringes
- Alcohol Pads

After the first two months, if the patient has not achieved their goal, then the dosage can be increased as follows:

- 1mg/week for 4 weeks
- 2mg/week for 4 weeks

To follow this schedule, the patient receives the following:

- 1 Semaglutide 12.5mg/2.5ml vial
- Syringes
- Alcohol Pads

After 4 months, next actions are based on clinical outcomes.

TIRZEPATIDE TITRATION GUIDELINE

The following guidelines on titration schedule are based on the commercially available products.

First Two Months:

- 2.5mg per week for 4 weeks
- 5mg per week for 4 weeks

To follow this schedule, the patient receives the following:

- 1 Tirzepatide 30mg/3ml vial
- Syringes
- Alcohol Pads

After the first two months, if the patient has not achieved their goal, then the dosage can be increased as follows:

- 7.5 mg/week for 4 weeks
- 10 mg/week for 4 weeks

To follow this schedule, the patient receives the following:

- 1 Tirzepatide 60mg/3ml vial
- Syringes
- Alcohol Pads

After 4 months, next actions are based on clinical outcomes.

CURRENT STATE OF GLP-1 MEDICATION

GLP-1 medications are effective for managing A1C levels and weight loss but are:

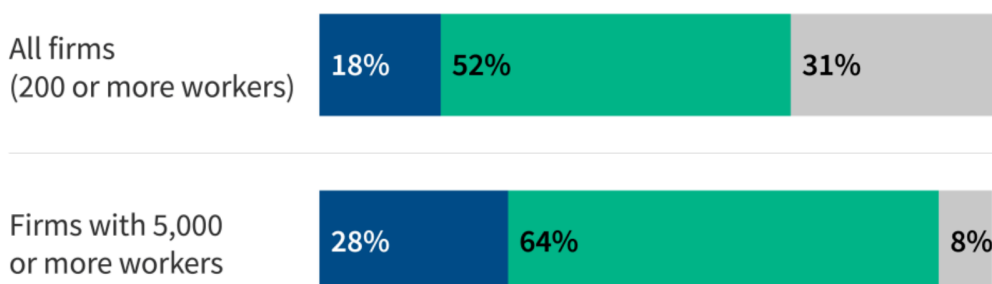

- Very expensive
- Rarely covered by insurance
- In short supply

High Costs and Limited Access

When it comes to weight loss, insurance is no help.

Most Large Employers Don't Cover GLP-1 Drugs for Weight Loss

■ Yes ■ No ■ Don't know

KFF "Employer Coverage of GLP-1 Drugs for Weight Loss is Limited and Restricted"

Due to limited availability and high demand, these medications have been added to the FDA's shortage list allowing compounding pharmacies to produce them at significantly lower costs. However, digital health companies are exploiting this with costly telemedicine subscription services while still overcharging for the medication.

Patient Care Challenges

Patients face two main options:

- Pay high prices at local pharmacies
- Use subscription services with potentially inferior care

The Springmeds Solution

Springmeds ensures patients stay under their actual providers' care, offering the best prices possible with no subscription fees, eligibility requirements, or upselling. We achieve this by collaborating with a 503B FDA-regulated outsourcing facility, an industry-leading online pharmacy, and working directly with providers.

ABOUT US

Springmeds and HealthWarehouse Pharmacy have partnered with a 503B FDA-regulated outsourcing facility for its excellent safety profile. The process is fully automated and sterile, adhering to the same cGMP standards as generic and brand-name medications.

A 503B compounding pharmacy, or “outsourcing facility,” follows strict FDA regulations to ensure the safety, quality, and effectiveness of its compounded medications.

The compounded medication contains the same active ingredient found in major brand-name drugs without the challenges of limited access or high costs.

Patients are provided the medication and necessary syringes along with a GLP-1 Injection Guide which can be viewed here:

<https://healthwarehouse.ac-page.com/springmeds-glp1>

About Springmeds

Springmeds is dedicated to reducing prescription costs for Americans. We prioritize lowering the prices of expensive generic medications while remaining competitively priced on common, inexpensive prescription drugs.

About HealthWarehouse

HealthWarehouse.com has been accredited by the National Association of Boards of Pharmacy® (NABP®) for Digital Pharmacy and is licensed / accredited with all 50 State Boards of Pharmacy. Based in Florence, Kentucky, HealthWarehouse.com is the leader in Digital Pharmacy and a pioneer in affordable healthcare, providing incredible patient services since 2007.
